Marine Technicians

Under new management and on track with major growth plans, the team at Nautek Marine are looking to hire skilled marine technicians / mechanics to work in our busy Marine service centres. Your duties will include installing and repairing electrical wiring, engine servicing, diagnosing electrical / mechanical problems with marine systems, repairing damaged electrical parts, and maintaining electrical equipment.

To ensure success as a technician, you should have a knowledge of marine electrical and mechanical systems, have a good eye for detail, and be able to fault find and problem-solve complex problems. Ultimately, a top-notch Technician can install, troubleshoot and repair any electrical / mechanical system in a vessel.

We are a company that is intent on building the best team and reputation in the industry and as such we have high expectations that successful candidates will be part of our team, uphold the company name with integrity, responsibility and honesty and most importantly are always willing to have a go.

Technician Responsibilities:

- Engine servicing.
- Installing and troubleshooting electrical problems.
- Diagnosing engine issues and proposing a course of action.
- Providing estimated time and parts for repairs.
- Installing new engines and electrical systems.
- Repairing and replacing faulty wiring or electrical systems.
- Ability to operate electrical diagnostic equipment.
- Completing job reports and processing paperwork.
- Ability to work in confined spaces.
- Maintain a clean working environment.
- Good communication skills.
- Ability to work standing or in a crouched position for long periods.
- Ability to distinguish subtle colour variations.
- Have a passion for boating / Fishing.

The successful candidates will be rewarded with a very competitive remuneration package and a great working environment.

If this sounds like you and you want to join a winning team, please email your cover letter and resume to: team@nautek.com.au
