# Information Session/Webinar: Small Engine Emissions and Evaporative Laws - What You Need to Know

## Small Engine Emissions and Evaporative Laws: What You Need to Know

**When:** July 14, 2016

**Where:** Marine House, 24 York Street - Level 1, South Melbourne, VIC 3205

**Time:** 8am to 12 pm

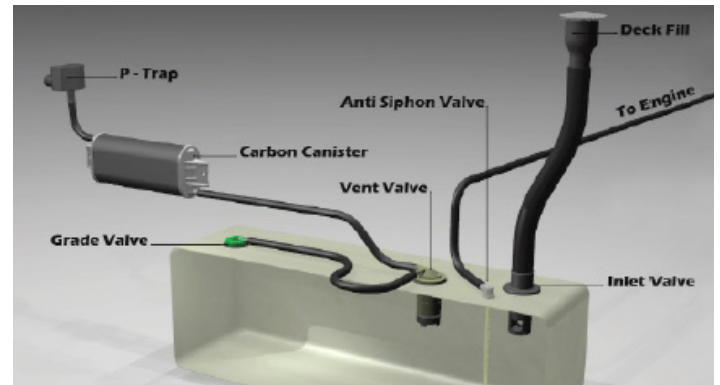

**Cost:** Free for BIAV and OPEA members; \$70 non-members

**RSVP:** Please submit your registration form by 7 July, 2016 by email to [info@biavic.com.au](mailto:info@biavic.com.au)

If your business is to attach an engine to a boat or pump, or install a fuel tank, you will be classified as a “manufacturer” with legal responsibilities under the Environmental laws planned for 2017.

With Small Engine Emissions and Evaporative Laws taking place from 2017, it is important for you to know:

- How these laws will affect your business
- What to do about clean engines
- Changes to fuel systems that need to be incorporated immediately
- How to capture market share now ahead of the laws

These questions and more will be answered in an exclusive information session by the Boating Industry Association of Victoria (BIAV) on July 14, 2016, in which all marine boat manufacturers and boat dealers are invited to attend. Presenting at the meeting will be world renowned experts in evaporative emission regulatory laws including:

- Craig Scholten - Technical VP, American Boating and Yacht Council (ABYC), USA
- Chris Bostwick - Engineering Manager, Attwood Corporation, USA
- George Bellwoar - VP Sales & Marketing, Perko, Inc., USA
- Chris Brown - Director of Compliance and Technology, SeaStar Solutions, USA
- Declan O'Connor-Cox - Director, Air Quality Section, Department of the Environment, Canberra

A selection of evaporative components will also be on display onsite for your inspection.

This information session is invaluable and will assist your business in the planning and preparation of compliant products to meet the emission regulations.

Register your attendance today for this important session today. Attendance can be done in-person or by webinar conference.

### **Schedule**

7am:	Arrival and registration
8am:	Introductions
8:05am:	Regulations Planned for Australia
9am:	Webinar with U.S. experts on Fuel Evaporative Systems
